The HONEY BEE

Honey bees have been producing honey for at least 150 million years.

To make one pound of honey, honey bees need to visit approximately 2 million flowers.

A single hive can contain up to 50,000 bees

WORKER BEE

Collects nectar and pollen, she builds and repairs comb, feeds the young, defends the hive, and performs other tasks as needed.

DRONE BEE

Mates with the queen bee, but he does not perform any other duties within the hive.

QUEEN BEE

Lays eggs, releases pheromones to control the behavior of other bees, and manages the overall health of the hive.

THE BUZZ ON BEES

Bees have five eyes
2 compound and 3 simple.

They communicate through dance.

Their wings beat about 200 times per second.

They can fly up to 15 miles per hour.

Bees are responsible for pollinating approximately one-third of the world's crops, including fruits, vegetables, and nuts.

Premium
